

Rotoplat 507 DW

Semi-Automatic Door & Window

Turntable Stretch Wrapping Machine

The Rotoplat 507 DW is equipped with a large diameter turntable and a unique clamping top platen that allow for wrapping doors and windows.

The 507 DW is capable of wrapping items with a thickness of 1.5" to 14" thick; 30" to 70" wide; and 80" to 110" high.

Adjustable brackets allow you to wrap different sizes, based on your needs.

The Power Dual Pre-Stretch Roll Carriage System (PDS) delivers 250% pre-stretch using fixed gears. You can easily switch to variable pre-stretch by activating the Double Stretch "S" button on the operator panel. Containment force is also adjustable from the operator control panel. Robopac's patented high-performance S-Wrap Pattern (with Quick Load System) and load cell compensation and containment force give you total film control.

A foot pedal controls the top platen, allowing the operator to hold the door in place, while lowering the clamp to secure the product.

The optional Pluripac delivery system applies foam/bubble wrap material at the same time as the stretch film to provide additional protection.

ROBOPAC

Robopac is the global leader in the stretch wrapping industry. Our line of semi-automatic and automatic stretch wrapping equipment combines technology, innovation and experience into products that deliver results you can depend on.

Robopac is ISO 9001:2008 certified and all our equipment meets the strictest global safety standards, including CE.

In 2008, Robopac hired Porsche Lean Consulting to help us implement their lean manufacturing process in our factory. This process allows us to build our equipment faster, better, for less.

Aetna Group holds over 100 patents and our commitment to innovation is the heart of our organization. With over 80 employees dedicated to Research & Development and a \$7.6-million investment in R&D in 2011, we are committed to maintaining our position as the global leader in secondary packaging.

Aetna Group has more than 120,000 machines installed around the world and currently produces 6,700 machines annually, more than twice that of our nearest competitor.

Our four product lines: Robopac, Robopac Sistemi, Dimac and Prasmatic offer complete lines of innovative stretch wrapping systems, bundlers, shrink wrappers, cartoning systems and tape machines through a global network of over 400 agents and distributors. We also employ over 80 technical service engineers ready to provide prompt and courteous support, whenever and wherever you need it.
